WELCOME

Dear Colleagues,

We are pleased to invite you to the **18th International Maritime Congress of Senology!**

Our understanding of the development and treatment of breast cancer continues to grow rapidly—doubling nearly every two years, that is, from one Maritime Congress to the next. New strategies in diagnostics and therapy are quickly being translated into clinical practice, including advancements in imaging and molecular diagnostics, reconstructive breast surgery, and, of course, systemic treatment of breast cancer.

From **June 19–21, 2025** we will once again come together with national and international experts to exchange ideas, discuss the latest clinical trial results, and explore emerging trends in senology. As always, **interdisciplinarity** will be at the heart of the program, allowing us to examine the newest insights from a wide range of professional perspectives and engage in meaningful discussions.

The congress venue, a hotel in the historic city of Zadar on the Croatian Adriatic coast, provides an ideal setting for intellectual exchange and collegial encounters.

Our speakers are internationally recognized experts in their respective fields, ensuring a **high-level scientific program** with strong relevance to everyday clinical practice.

We look forward to welcoming you to Zadar and remain,
with warmest collegial regards,

Univ. Prof. Dr. Alexandra Resch

Univ. Prof. Dr. Günther Steger
